Solar Panels Policy

The solar panels are defined as a collection system for an alternative source of electrical power for a homeowner. Any homeowner who wants to place a solar collection system on their property must first submit an application to the Architectural Control Committee (ACC) in accordance with the Declaration of Covenants, Conditions and Restrictions, Article IX, Section 9.16. . The ACC will review each request on a case by case basis. Each request will be reviewed based on any Federal, State and Municipal Laws regarding solar panels collection systems. Each request will also be reviewed on the design and placement of the collection system.

The above policy was approved by the Board of Directors at the August 4, 2009 Board of Directors Meeting.
